Annie Lennox has released a single titled *SING*. *SING* is the second single from her new album *Songs of Mass Destruction*. It is aimed at raising international awareness of the impact of HIV/AIDS in South Africa, particularly the epidemic's toll on women and children, and will be accompanied by a media and web campaign to encourage people to actively get involved in reversing the course of the HIV/AIDS pandemic. Featuring the vocal talents of 23 major female artists, including Angelique Kidjo, Madonna, Melissa Etheridge, Dido, Pink, Shakira, Fergie and Céline Dion, proceeds from the *SING* single will be donated to TAC. Also featured on the single are the members of TAC's choir The Generics, whose 2001 song on preventing mother-to-child transmission, *Jikelele*, provides the outro to *SING*.
